

*** SWITCH TO LED!!!**

*** START SAVING**

UP TO 85%

**ON YOUR
LIGHTING BILL!**

*** Replace your traditional lighting features with the development of high efficiency and high power LEDs, it has become possible to use LEDs in lighting and illumination. Replacement light bulbs have been made as well as dedicated fixtures and LED lamps.**

WHY LED?

1.

* Reduced Power Usage

* LED lighting's have extremely low power consumption and can emit more light per watt. It can save 85% energy when compared to conventional light sources, as well as helping to reduce CO2 emissions.

2.

* Long Lifetime

- * The Lifespan of LED lightings can be over 50,000 hours, reducing maintenance and service costs, they are also unaffected by regular switching cycles.

3.

*Eco Friendly

- *LED lightings do not contain harmful substances such as lead or mercury. They are RoHs compliant.

4.

* Design Flexibility

*The nature of LEDs construction support design flexibility by providing compact light source.

5.

* Robust and Solid State

- * LEDs do not contain any moving parts nothing to break, shatter, leak or contaminate the environment. LEDs have no start up delay or ignition problems, operate at low voltages providing increased safety and silent.
